

Illinois Funds - Money Market Fund (The)

Principal Stability Fund Ratings Definitions

AAAm A fund rated 'AAAm' demonstrates extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. 'AAAm' is the highest principal stability fund rating assigned by Standard & Poor's.

AAm A fund rated 'AAm' demonstrates very strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. It differs from the highest-rated funds only to a small degree.

Am A fund rated 'Am' demonstrates strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk, but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than funds in higher-rated categories.

BBBm A fund rated 'BBBm' demonstrates adequate capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. However, adverse economic conditions or changing circumstances are more likely to lead to a reduced capacity to maintain principal stability.

BBm A fund rated 'BBm' demonstrates speculative characteristics and uncertain capacity to maintain principal stability. It is vulnerable to principal losses due to credit risk. While such funds will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

Dm A fund rated 'Dm' has failed to maintain principal stability resulting in a realized or unrealized loss of principal.

Plus (+) or Minus (-)
The ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Fund Highlights

- The Illinois Funds - Money Market Fund has served public entities in Illinois for over 30 years.
- The pool invests in very liquid, high-quality short-term investments.

Rationale

Standard & Poor's rates the Illinois Funds - Money Market Fund 'AAAm'. This rating is based on Standard & Poor's analysis of the pool's credit quality, market price exposure, and management. The rating demonstrates that the fund has an extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk.

Overview

The Illinois Funds - Money Market Fund was developed and implemented in 1975 by the Illinois General Assembly under the jurisdiction of the treasurer. It was created to provide an investment alternative for public treasurers across the state. Today, there are over 7,000 taxing entities in the State of Illinois; currently, the fund is comprised of over 6,800 accounts. The purpose of the Illinois Funds - Money Market Fund is to provide public treasurers within the state of Illinois an alternative investment vehicle that enables the treasurers to earn a competitive rate of return while they maintain immediate access to invested funds. Any custodian of public funds in Illinois qualifies for participation in the Illinois Funds - Money Market Fund.

Management

The investment management duties for the Illinois Funds are assumed by the Portfolio Management Division of The Office of the Illinois State Treasurer. Robert Holley is the Director and portfolio manager. The portfolio manager reports directly to the Chief Finance Officer, Rodrigo Garcia, who reports directly to the Deputy Treasurer, Jay Rowell, who reports to

the state Treasurer, Michael W. Frerichs. The investment policy committee is comprised of the Treasurer, Deputy Treasurer, Chief of Staff, Chief Finance Officer, Portfolio Manager, Manager of Banking, Cash Management Officer, Chief Legal Counsel and Director of Accounting. U.S. Bank provides the pool with administrative and distribution services.

Portfolio Assets

The Illinois Funds - Money Market Fund invests in U.S. Treasury obligations, repurchase agreements collateralized at 102% by U.S. Treasury obligations, certificates of deposit issued by an Illinois financial institution, U.S. agency mortgage-backed securities, and U.S. Treasury only money-market funds rated 'AAAm' by Standard & Poor's. Other investments include commercial paper rated in one of the two highest rating categories by Standard & Poor's with a maximum final maturity of 270 days, and no asset-backed securities will be included. The final maturity on all securities is limited to one year. According to stated investment guidelines, the pool is prohibited from investing in reverse repurchase agreements.

Participants should consider the investment objectives, risks and charges and expenses of the pool before investing. The investment guidelines which can be obtained from your broker-dealer, contain this and other information about the pool and should be read carefully before investing.

Principal Stability Rating Approach and Criteria

A Standard & Poor's principal stability fund rating, also known as a "money market fund rating", is a forward-looking opinion about a fixed income fund's capacity to maintain stable principal (net asset value). When assigning a principal stability rating to a fund, Standard & Poor's analysis focuses primarily on the creditworthiness of the fund's investments and counterparties, and also its investments' maturity structure and management's ability and policies to maintain the fund's stable net asset value. Principal stability fund ratings are assigned to funds that seek to maintain a stable or an accumulating net asset value.

Generally, when faced with an unanticipated level of redemption requests during periods of high market stress, the manager of any fund may suspend redemptions for up to five business days or meet redemption requests with payments in-kind in lieu of cash. A temporary suspension of redemptions or meeting redemption requests with distributions in-kind does not constitute a failure to maintain stable net asset values. However, higher rated funds are expected to have stronger capacities to pay investor redemptions in cash during times of high market stress because they generally comprise shorter maturity and higher quality investments.

Principal stability fund ratings, or money market fund ratings, are identified by the 'm' suffix (e.g., 'AAAm') to distinguish the principal stability rating from a Standard & Poor's traditional issue or issuer credit rating. A traditional issue or issuer credit rating reflects Standard & Poor's view of a borrower's ability to meet its financial obligations. Principal stability fund ratings are not commentaries on yield levels.
